

Closed POD Staffing and Space Planning Chart

Instructions for this chart:

These estimates are based on dispensing antibiotics within an 8- hour period of time (a typical work day).

The estimated number of clients coming through per hour is in the left-hand column.

The minimum number of needed staff are listed by position. Anytime there are POD sites without staff in all possible positions, it is expected that existing staff will perform multiple job functions (i.e. an Operations Chief will perform functions of helping to complete forms, screening and dispensing if they are the only person working - or the Logistics chief would perform all inventory and personnel coordination work).

Breaking functions down increases efficiency but also requires more space.

The two functions that take the most time include completing the screening form and making screening recommendations.

*A small amount of space can be used for screening and dispensing as long as there is always a hallway or distinct area where people can line up to complete forms.

**Signs can be used in the place of people to give instructions about checking in and how to complete screening forms when there are not large crowds.
